## Kaubit FA Wall Sleeve NG

## Technical Data Sheet

01.12.2021

### Elastic sleeve for a permanent sealing of pipe passages in combination with sealing systems under tiles.

#### Properties:

Kaubit FA Wall Sleeve NG is watertight, permanently elastic sealing. The packing is made from NBR-Rubber with a centrally inserted fabric layer. This material basis causes an excellent bonding with almost any waterproofing materials used under tiles extending over the entire surface of the packing.

#### Applications:

Kaubit FA Wall Sleeve NG is suitable as permanently watertight sealing on wall areas for pipe passages of shower and bathtub water fittings under ceramic coverings. The packing is complete embedded into the sealing compound.

#### Technical specifications:

Measurements: 100 up to 250 mm  
Temperature resistance: -20°C to +90°C

#### Preparation of the substrate:

The preparation of the surface depends on the respective waterproofing system used.

#### Use:

The packing is put over the pipe passage, laid and pressed into the fresh sealing mass. When applying the second coating with the sealing mass the entire packing is coated as well. When the waterproofing system has to be applied in one coat the packing is laid into a previously applied thin layer of the system before the system is applied over the whole area.

#### Information on further processing:

Kaubit FA Wall Sleeve NG is absolutely silicone-compatible; a soaking must not be expected. For lining the joints usual silicones may be applied. Solvent-free adhesives and coatings may be applied directly onto the Kaubit FA Wall Sleeve NG. Before applying further products a compatibility test has to be carried out.

#### Cleaning of tools and equipment:

Tools and soiled areas should be cleaned immediately after use with water.

#### Storage:

Kaubit FA Wall Sleeve NG can be used for a period of at least 24 months when stored in a cool and dry period.

#### Supplied as:

10 pieces / carton  
25 pieces / carton

#### Further units available on request.

#### Safety information:

The product is not hazardous as defined in the (German) Hazardous Substances Code.

#### Disposal:

May be disposed of as building site waste.
